Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/085,018

Applicant(s)

SASAKI ET AL.

Examiner

David D. Davis

Art Unit

2627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) 8, 10 and 11 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 6, 7 and 9 is/are rejected.
- 7) ☒ Claim(s) 4 and 5 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 01 March 2002 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Election/Restrictions

1. Claims 8, 10 and 11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on January 23, 2006.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

3. Receipt is acknowledged of the Information Disclosure Statement (IDS) received July 2, 2003.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the inner lid must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure

Art Unit: 2627

must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

6. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In line 2 of claim 5, "the third position" is indefinite because it lacks antecedent basis.

7. Claim 9 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically, "an inner lid attached

to said instrument body” is not described in the specification in such a way as to enable a skilled artisan to make and/or use the invention.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-3, 6-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al (US 5,848,042). As per claim 1, Takahashi et al shows in figure 4 an electronic instrument 1 including an instrument body 2, a first operation unit 6 and second operation unit 5 which are movable relatively to the instrument body 2. The first operation unit 6 and the second operation unit 5 have exposed planes to be exposed in front of a plane 4a of the instrument body 2.

The first operation unit 6 and the second operation unit 5 are movable between a first position, as shown in figure 2 of Takahashi et al, where the exposed plane of the first operation unit 6, the exposed plane of the second operation unit 5 and the plane of the instrument body 2 are arranged in such an arrangement direction as to overlap one another so that the exposed plane of the first operation unit 6 is located in front of the exposed plane of the second operation unit 5 and the exposed plane of the second operation unit 5 is located in the front of the plane of the instrument body 2. The first operation unit 6 and the second operation unit 5 are movable between a second position, as shown in figures 3 or 4 of Takahashi, where the respective

exposed planes of the first operation unit 6 and the second operation unit 5 are exposed. The first operation unit 6 and the second operation 5 are moved relatively to the instrument body 2 when they are moved between the first and second position.

As per claim 2, Takahashi et al shows in figure 4 a recording medium slot 3 from which a recording medium can be inserted into the instrument body 2 that is made in the plane of the body. The recording medium inserting slot 3 is covered with the second operation unit 5 when the first operation unit 6 and the second operation unit 5 are located at the first position. The first operation unit 6 and the second operation unit 5 are movable relatively to the instrument body 2 to a third position, as shown in figures 3 or 4 where the recording medium inserting slot 3 is exposed.

As per claim 3, Takahashi et al shows in figures 3, for example, the first operation unit 6 moving from the first position so as to leave from the plane of the instrument body 2 in the arrangement direction and thereafter moving downward of the body 2 to the second position. As per claims 6 and 7, Takahashi et al shows in figure 3, for example, that immediately after the first operation unit 6 and the second operation unit 5 has been situated at the second position, it is rotated around a first rotary center in a width direction of the instrument body 2 so that the exposed plane of the first operation unit 6 and the second operation unit 5 is oriented upward.

As per claim 9, Takahashi et al shows in figure 4 the first operation 6 removable from an inner lid attached to the instrument body 2. The inner lid with first operation unit attached is movable between the first position and second position. The first operation unit 6 is detached from the inner lid. The second operation unit 5 is situated at the first position between the inner

Art Unit: 2627

lid and the plane of the instrument body 2 and the inner lid. The second operation 5 and the plane of the body 2 are arranged to overlap another.

Allowable Subject Matter

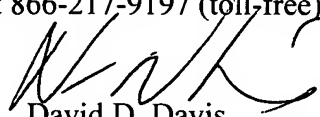

10. Claims 4 and 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. *Note: claim 5 is considered to depend from claim 2. Therefore, the objection of claim 5 is based on that consideration.*

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Davis whose telephone number is 571-272-7572. The examiner can normally be reached on Monday thru Friday between 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dwayne D. Bost can be reached on 571-272-7023. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
